

Consultancy Package “Change Management Compass”

ILC Management Consulting for a Holistic Change Management

Changing products and production processes is very challenging: Because a large number of people are involved in the changes and a comprehensive IT support is difficult. Because changes can result in high costs and because they are often time-critical. The conceptual design of a holistic change management has to take many different aspects into account. In addition to the composition of the business processes, a particular importance lies on organizational issues as well as on the reasonable use of methodologies, the review of product data models and the best possible support with IT. With our **Change Management Compass**, we have developed a standardized approach that focuses on the important topics, asks the right questions and outlines possible solutions. It will allow you to take fast and reliable steps down the road to a holistic change management in your company.

Current situation

- ❏ change processes lack transparency
- ❏ changes take too long and cause high costs
- ❏ IT supports change processes insufficiently
- ❏ change management does not get the attention it needs in the organization
- ❏ methodologies are not applied uniformly or not applied at all
- ❏ KPIs are not used sufficiently or not used at all

Crucial questions

- ❏ Which strategies are effective for your change management?
- ❏ Which business processes are most beneficial to support your goals?
- ❏ With which organization should you carry out your business processes?
- ❏ Which methodologies lead to more efficiency?
- ❏ Which IT support is necessary?
- ❏ Which key performance indicators support the optimization of your change management in the medium and long run?

Reach your goal quickly and reliably using the CM Compass

By using the **Change Management Compass**, our experienced consultants employ a procedure that provides them with a toolkit of tried-and-tested methods and best practices. It will help you find your customized CM roadmap quickly, reliably and in high quality.

Workshop

In joint workshops, we take a close look at your current CM structure and identify your requirements.

Analysis

We thoroughly analyze the knowledge gathered in the workshops, determine weak points and identify areas with potential for improvement.

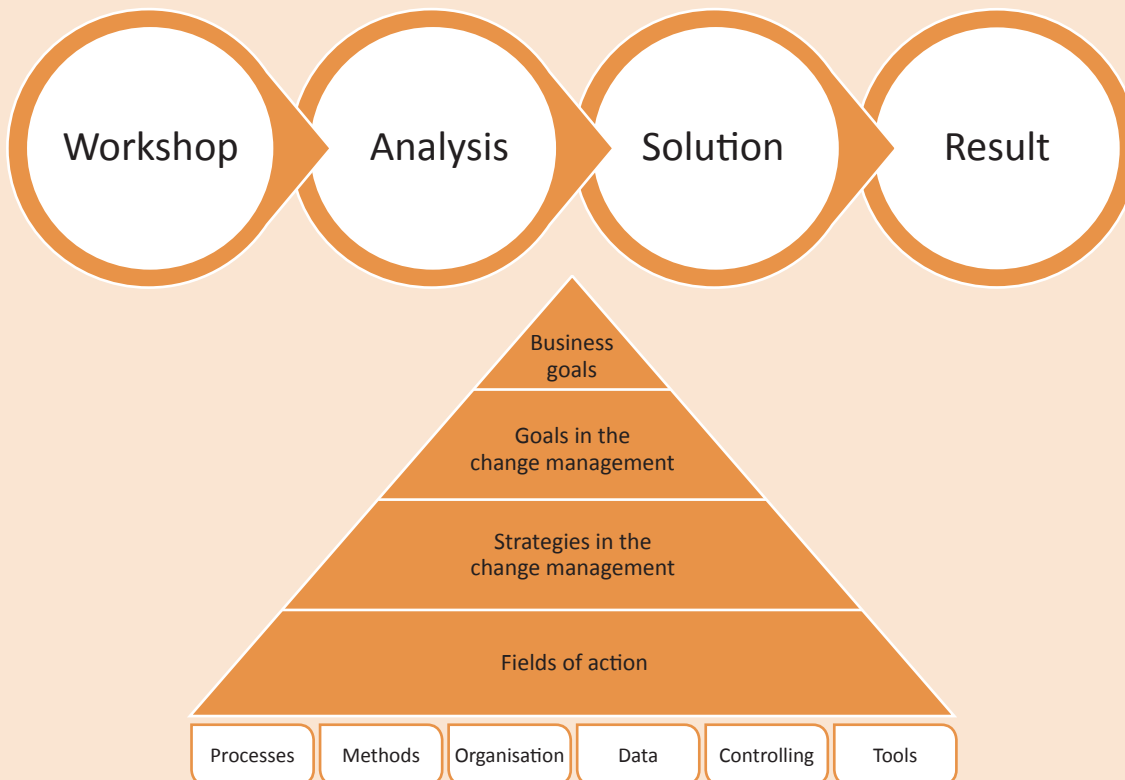

Solution

We develop tailored solutions and present them in a clear overview.

Result

We present concrete recommendations for action and thereby enable you to take the next steps.
